**Subject:** Pavillion shallow waste sites

Hello Patricia,

I am trying to find more information regarding the shallow waste sites in the Pavillion gas field. The EPA draft report, which I've reviewed in detail, mentions there are 33 shallow waste disposal sites and the EPA is studying them. Other than the samples from three shallow monitoring wells, I find no additional information on the EPA web site (or anywhere).

Can you please direct me to any work that EPA has done on these sites? Specifically, I'd like to know to have a map or coordinates for each of them, but also any info on their history.

Thanks much in advance.

Tom
